

## Waste disposal at the Port of Oslo 2023

### Sludge and oily water waste

Collecting of sludge and oily water waste price pr. Liter NOK 2,25  
2 , 2 5 5 Collecting per hour Hourly pay NOK 1,670, -

*Connection:* DN 100 PN 16 (4 hole Out Diameter 220 mm hole to hole 180 mm)

For collecting and transporting, we use vacuum trucks.

If the sludge is to be pumped ashore onto the trucks, we need to know the pressure the pump aboard is giving.

The capacity of the trucks for sludge and oily water waste is 28.000 Liter

### Grey and black water

Our definitions of grey water = water from washing and showering and  
black water = water from toilets/septic.

---

We can offer:

Collecting, transporting and disposal of grey/black water: price pr. Liter NOK 1,03  
Collecting per hour Hourly pay NOK 1,725, -

*Connection* : DN 100 PN 16 (4 hole Out Diameter 220 mm hole to hole 180 mm)

Collecting and transporting grey and black water we use vacuum trucks.

If the sludge is to be pumped ashore onto the trucks, we need to know the pressure of the pump aboard the ship.

The capacity of the trucks for grey/black water is 12.000 – 15.000 liters

If necessary, we can provide storage tanks placed on the docks, with a capacity of approx. 30 m<sup>3</sup>. The rent for these tanks is NOK 710, - pr. day + the cost of transport of the tanks to and from the docks NOK 11590, -

Cleaning of storage tanks after use Price pr. tanks NOK 3,428, -

Collecting, transporting and disposal of the materials from the tanks will be done at the above specified prices.

---

**The prices are based on collecting materials Monday–Friday in within 07.00 – 15.00 hour.**

If the collections have to be done outside office hours, there will be an additional cost of NOK 1725, - plus NOK 546, - per hour pr. person working on the trucks. It is necessary with two persons pr. truck.

All Prices are given ex vat.
